ITEM	QUANTITY	DESCRIPTION	UNIT PRICE	DISC.	UNIT	TOTAL
		<u>SPECIFICATIONS FOR PACKAGING ALL UNITS</u>				
		1. (a) In packaging Rack Sets G, H, J, K, exterior containers will be constructed in accordance with best commercial practice for overseas shipment and storage for at least six months. (b) Preservation and packaging will be in accordance with Method II as applicable of MIL-P-116C. (c) Inspection Ports need not be supplied, but all locations of Dehydrator Indicators will be clearly marked on the outside of the containers. Access thereto shall be possible without any damage to the container barrier.				
		2. All racks are to be packaged for horizontal transport and storage.				
		3. Boxes for overpack must conform to Jan-P-106a and/or Jan P-105a. They must be constructed of 3/8" exterior plywood, reinforced with pine, and cleated. Skids will be added where necessary. All boxes to be lined with waterproof paper conforming to Spec. Jan P-125.				
		4. Cushioning bracing and blocking shall be adequate for an 80 G Pack for all Racks and a 25 G Pack for Rack components. Combining of components into one overpack, where specified by R-W, is permitted. This combining should result in not less than a total of twenty-seven (27) boxes to package one (1) set consisting of four (4) racks and respective components.				
		5. Particular care must be exercised in packaging all tape transport units. They are to be cradled, cushioned with rubber, and to have full perimeter contact on transport with steel strapping on ends. Transports in "G" rack to have a center support in cradle.				
		6. Barrier bags, per MIL-B-131B, Type I, Class I and desicant per MIL-D-3464 are to be used.
